

REPORT ON AWARENESS DRIVE FOR VACCINATION

Organized by: Student Club, J.S. University

Date: 07/08/2022

Participants: 98

Event Overview:

In 2022, the **Student Club of J.S. University** conducted an **Awareness Drive for Vaccination** with 98 participants. The drive aimed to educate the public on the importance of vaccinations, particularly in the context of COVID-19, and to encourage higher vaccination rates within the community.

- **Objective:** The drive was designed to raise awareness about the benefits of vaccination, dispel myths, and motivate individuals to get vaccinated for their safety and public health.
- **Activities:**
 - **Information Campaign:** Participants distributed pamphlets and educational materials highlighting the importance of vaccinations, their effectiveness, and the safety measures involved.
 - **Interactive Sessions:** Volunteers engaged with community members to answer questions and clear doubts related to vaccine safety, eligibility, and availability.
 - **Registration Assistance:** The drive provided assistance in helping people register for vaccination slots, especially those who were unfamiliar with the digital process.

Conclusion:

The **Vaccination Awareness Drive** was effective in increasing public awareness about the critical role vaccines play in controlling the spread of diseases. The drive helped alleviate concerns and misconceptions, encouraging many individuals to take steps towards getting vaccinated, thereby contributing to the health and safety of the community.
