

## **REPORT ON AWARENESS DRIVE ON WORLD VACCINATION DAY**

**Organized by:** NYPS, Government of India

**Date:** 10/11/2022

**Participants:** 121

### **Event Overview:**

In 2022, an **Awareness Drive** was organized by the **National Youth Program Scheme (NYPS)** under the **Government of India** on **World Vaccination Day**. A total of 121 participants took part in this initiative aimed at promoting the importance of vaccination for disease prevention and public health.

- **Objective:** The drive was conducted to spread awareness about the significance of vaccinations in eradicating diseases, protecting individual health, and achieving herd immunity. It also emphasized the need for routine immunizations, in addition to COVID-19 vaccinations.
- **Activities:**
  - **Educational Talks:** Health experts delivered talks on the benefits of vaccines, their role in preventing life-threatening diseases, and the importance of maintaining vaccination schedules for children and adults.
  - **Community Outreach:** Volunteers distributed informational leaflets and engaged with the public to address common concerns and misconceptions about vaccinations.
  - **Mobile Registration Units:** Mobile units were set up to assist individuals in registering for vaccination appointments and to provide on-site guidance regarding vaccine availability.

### **Conclusion:**

The **Awareness Drive on World Vaccination Day** was a significant success, with active participation from the community. It played a crucial role in improving public understanding of the value of vaccines and encouraged people to ensure timely vaccinations for themselves and their Family.
