

Event Report : Green Energy Solutions Workshop

Date: November 15, 2023

Location: J S University, Engineering Lab

Event Overview:

A workshop on Green Energy Solutions was conducted as part of the collaboration between J S University and Hydro Green. The workshop focused on educating students about sustainable energy technologies and their applications.

Highlights:

- **Introduction:** The workshop was introduced by Dr. Ankit Yadav, Head of the Agriculture Department at J S University, who highlighted the importance of green energy in addressing global challenges.
- **Training Sessions:** Experts from Hydro Green led sessions on topics such as solar energy, wind power, and energy storage solutions.
- **Hands-On Activities:** Students participated in hands-on activities and demonstrations, working with green energy technologies and equipment.
- **Discussion and Q&A:** A discussion session allowed students to ask questions and gain deeper insights into green energy technologies and their implementation.

Outcome:

The workshop provided students with practical knowledge and hands-on experience in green energy solutions, preparing them for careers in the renewable energy sector.

Event Report : Sustainability Research Symposium

Date: November 25, 2023

Location: J S University, Conference Room

Event Overview:

A Sustainability Research Symposium was organized to showcase research and projects related to sustainable technologies, facilitated by the collaboration between J S University and Hydro Green.

Highlights:

- **Opening Remarks:** Dr. Amit Kuar Chaturvedi, Dean of Research at J S University, welcomed the attendees and introduced the symposium's objectives.
- **Research Presentations:** Researchers from both J S University and Hydro Green presented their findings on topics such as waste management, sustainable agriculture, and green building technologies.
- **Panel Discussion:** A panel discussion featured experts discussing the future of sustainability research and the role of academia-industry partnerships in driving innovation.
- **Poster Session:** A poster session allowed students and researchers to display their work and engage with attendees in one-on-one discussions.

Outcome:

The symposium facilitated the exchange of research ideas and highlighted the impact of collaborative efforts in advancing sustainability research and innovation.
